Depression, Anxiety & Substance Use During COVID: Tools for Screening and Management in General Medical Settings

Thursday, October 29th @ 6:00pm

From social isolation to economic recession, the COVID-19 pandemic has impacted the mental health of people all over the world. Join us for this in-depth exploration of how to best help your patients identify changes in their mental health, and provide tools for dealing with life stressors in this ever changing landscape. A Facebook Live session will follow - check out our social media for more information!
